

Landing Page Calendar Module

Calendar Module

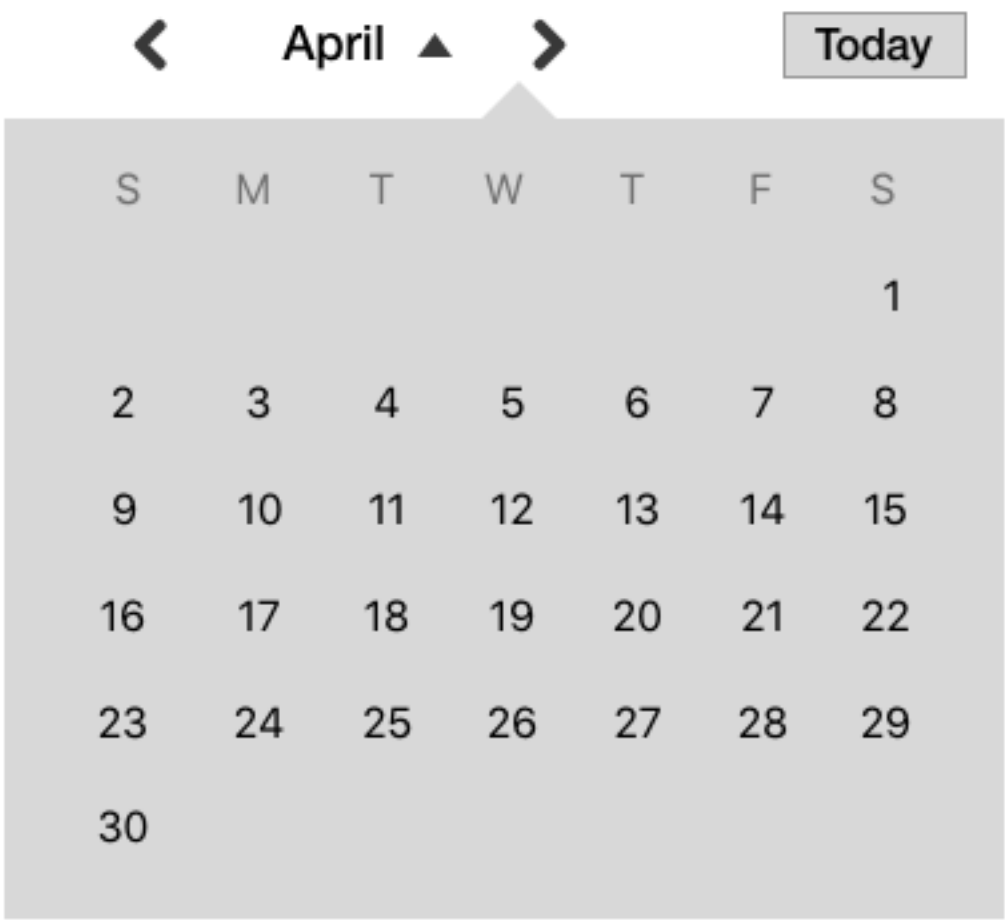

On tap on the date/month header. The inline calendar module shows up with the current date highlighted in circle. A small dot under a date represents that the user have rooms booked on that calendar date.

Calendar_Module_Date Selected

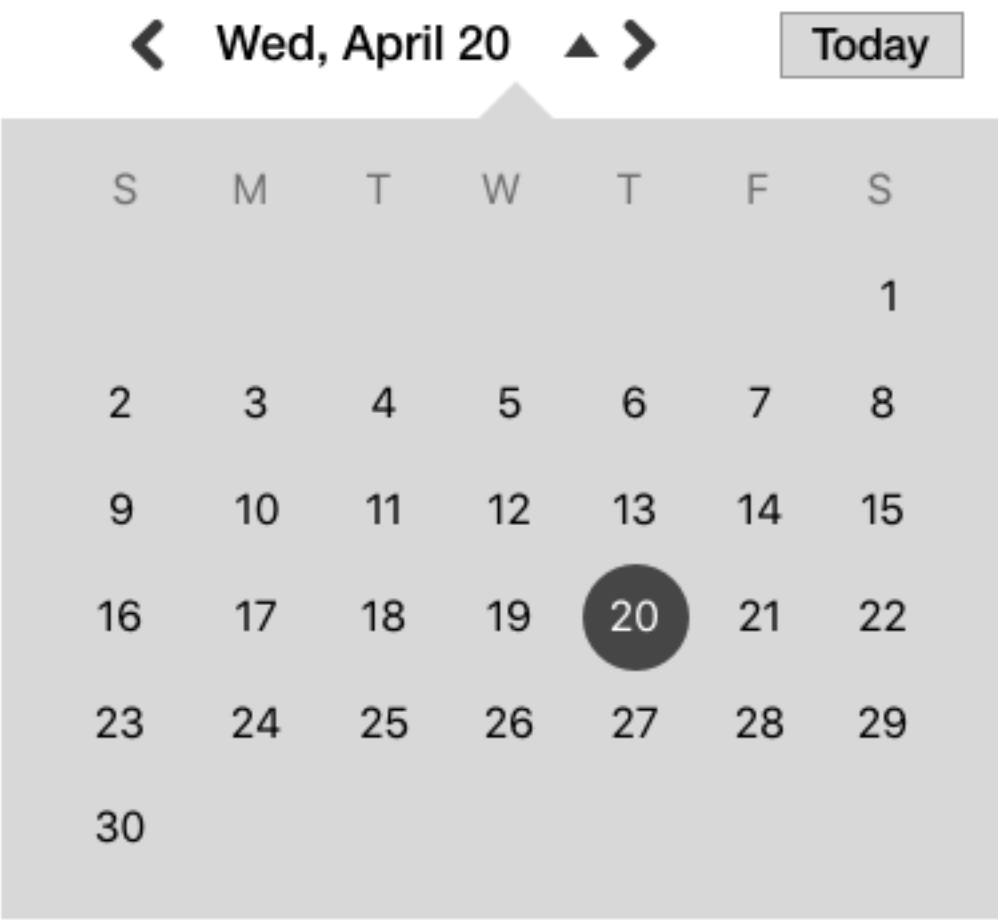

On tap on a date/month other than the current date, the "Today" button will shows up. When users tap on today, the calendar will reset to its initial state.

Calendar_Module_New Month

On tap the carrot, the calendar module populates the exact month. The Month header will change accordingly.

Calendar_Module_Month/Date Selected

On tap at a date of a new month, the Month header will have a "date of the week" shows up along with the existing date format.

Inline Calendar Module

In-line module_Opened

On tap on the date/month/year input field. The inline calendar module shows up with the current date highlighted in circle.

In-line module_New month

On tap the carrot, the calendar module populates the exact month. The Month/Year header will change accordingly.

In-line module_New month/date selected

On tap at a date of a new month, the Month/Year header will have a "date of the week" shows up along with the existing date format in the calendar input field.

Inline Calendar Module - Various Cases

Notification message in the calendar in-line module with the available timeslots

Wed, Mar, 15, 2017

2:30 PM
Not Available

Oops! Looks like this room has booked by

- Nicole Okumu
- Mark Green
- Lawrence Lee

Please contact these people to resolve the scheduling conflict

Or choose a available timeslot

11:00AM

11:30AM

12:00PM

When you change the date and the time is not available. The system shows the room has booked by someone and provides a list of suggested timeslots for users to pick from.

This widget shows up only when users book a specific room from clicking a timeslot from the time table.

This will happen in the following scenarios:

- The room you booked has taken by someone who are ahead of you by few secs.
